STASER:

I'd like a piece of paper that takes a look at the Soviet strategic capability ~~vs~~ the U.S. strategic capability that balances and breaks it out into what weapon systems it is in in terms of what percent of the total numbers and what ~~per~~centage of the total are in the B-52's, are in the Minuteman or in the SLBMs and the same thing on the Soviet side ~~for~~ their different. Looking at, I suppose, RVs, and equivalent megatonnage but maybe there is a better gadge.
